DETAILED ACTION

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 42, 43 and 49-63 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ober et al, U. S. Patent 4,692,188.

Reference to Ober et al teaches the claimed composition with the particle size (see columns 3 and 5) and the amount of dye (see column 5) as required. The reference does not specify water solubility of monomers in the polymer used but does disclose the broad use of various monomers, which provides motivation for the choice absent evidence of unexpected results commensurate in scope to the claims. Other components added in claims 50-60 are referred to as conventional and are either taught or prima facie obvious from the reference.

3. Claims 44-48 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The specific particle size or types of monomers are such that the closest prior art fails to provide motivation to one of ordinary skill in the art to select these required elements.

4. Applicants are requested to substitute the conventional language "selected from the group consisting of" in the claims containing the phrase "selected from" in order to more precisely define the group.

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
